

Additional Word Clock outputs for the DCD-8

The CX-4 is an option card designed for the Brainstorm DCD-8 Word Clock Distributor. It provides 4 additional Word Clock outputs through its 4 BNC connectors.

The 4 outputs are grouped in 2 pairs. These pairs are identical to the last pair on the DCD-8, outputs 7 & 8, with the same reference and frequency. Also, termination is measured and displayed just like the other DCD-8 word clock outputs.

Installation is very simple and can easily be performed by any qualified technician. Software version 2.20 or later is required for the CX-4.

For set-ups requiring more than 8 word clock outputs, the CX-4 is a simple and inexpensive solution.

SPECIFICATIONS

No of outputs:	4
Waveforms:	All rise and fall times per their respective standards
References:	Video (HD & SD), WC, AES, S/PDIF, ADAT, GPS, Internal crystal
Frequency:	All standard rates, up to 192K - Same selection as outputs 7 & 8
DCD-8 domain:	Same selection as outputs 7 & 8
Connectors:	BNC - 75Ω - DC coupled
Form Factor:	2" x 5.4" PCB - option for Brainstorm DCD-8 only
